Corvette Color Laminated Wiring Diagram, 1953-1981

The orange wire is the power wire for both seats. It gets its power from the power seat circuit breaker (20 amp) located at the body relay block. It is located behind left side of dash near fuse block. Remove circuit breaker and check for power in body relay cavity that you pulled the relay out of if power is on one side change circuit breaker and if no power on either side then you have a bad main fuse near battery or under hood in main fuse block.
