Expert C Programming

Thus, in C string is stored in an array of characters. Each character in a string occupies one location in an array. The null character '\0' is put after the last character. This is done so that program can tell when the end of the string has been reached. For example, the string "I Like C Programming" is stored as follows.

CProgramming Expert - Programming can be fun.

Just because someone is a C expert doesn't mean that they're a good software developer. Experience and language familiarity are good, but I think they are both trumped by that intangible, un-quantifiable property that makes someone a "good software developer". What I'm trying to say is, "What makes you a C programming expert?" is not a useful question, because there are more important questions. If someone is a Good

Peter van der Linden's "Expert C Programming: Deep C Secrets", published in 1994, is already a classic. It explicitly assumes the reader knows how to program in C (according to the author, this "should be every programmer's second book on C"). In that sense, it is similar to Scott Meyers' "Effective C++" (originally published in 1991).
