Another recent development of an expert system was made in the talent recruitment/human resource industry. Wade&Wendy is an AI based expert system that is programmed to have a conversation with a client (employer), and use its heuristics driven by knowledge-based algorithms to figure out the exact information that it needs to recruit a suitable candidate for the organization's hiring needs.

In artificial intelligence, an expert system is a computer system emulating the decision-making ability of a human expert. Expert systems are designed to solve complex problems by reasoning through bodies of knowledge, represented mainly as if-then rules rather than through conventional procedural code. The first expert systems were created in the 1970s and then proliferated in the 1980s.
