Hazard Mapping Osha

Hazard Mapping is only one method for identifying occupational safety and health hazards. If your workplace has other systems for identifying hazards, those results can be included on your Hazard Map. The point of Hazard Mapping is to pool the knowledge about hazards from all of your coworkers so that you can organize to eliminate the hazards.

Finding Hazards

A hazard map is a visual representation of the workplace showing hazards that could cause injuries or illness. The method draws on what workers know from on-the-job experience. It works best when driven by a small group of workers whose jobs are similar. Hazard mapping can identify risks throughout an entire facility at a glance.

Hazard Recognition and Control Strategies - Grainger KnowHow

The Seismic Hazards Mapping Act (SHMA) of 1990 (Public Resources Code, Chapter 7.8, Section 2690-2699.6) directs the Department of Conservation, California Geological Survey to identify and map areas prone to earthquake hazards of liquefaction, earthquake-induced landslides and amplified ground shaking.
