I have an old Kelvinator air conditioning. Not sure what the model is since I have lost the manual, but from the remote control I can see some code looking like the model number: 6711A20012M. A few weeks ago the remote control died while the air con was on.

Help! Kelvinator Air Con not working - Air conditioners

No luck on the Kelvinator site, so could someone help me with a copy of the user manual, or with the symbols on the remote. So far I have determined that for the concealed controls - those under a hinged flap, that for the modes, the snowflake is for cooling, sun is for heating, water droplet for dehumidifying, but there is a black triangle ...

Remote control - N216 symbols - Air conditioners

If the air filter is clogged, air cannot flow properly through the air conditioner. This greatly reduces the cooling capacity of the air conditioner. In addition, if the air filter is clogged, the evaporator coils will frost over. To remove debris from the air filter, try cleaning the filter. If it is not possible to clean the air filter ...
