not is a choice based on personal preference and physician recommendations (see chart below).

Airway Clearance Vests for Cystic Fibrosis

Airway clearance techniques (ACTs) are treatments that help a person with CF breathe easier. ACTs loosen thick, sticky lung mucus so it can be cleared by coughing or huffing. Clearing the airways reduces lung infections and improves lung function.

Airway Clearance | CF Foundation - Cystic Fibrosis Foundation

Multiple sclerosis (MS) is a chronic disease that affects the central nervous system (CNS), which includes the brain, spinal cord and optic nerves. It causes inflammation and the destruction of myelin. Myelin surrounds nerve fibers and acts like insulation on a wire, preventing "short-circuits" that divert a nerve signal from having its desired effects.

Another consideration in determining stage and prognosis in patients with HCC is the degree of liver fibrosis. There are many different scoring systems used to determine the degree of liver fibrosis. With one such scoring system, the Ishak fibrosis staging system, stages 1 through 5 had no direct correlation with survival, however, stage 6 was
