## **Answered: In c programming, with examples, when,... | bartleby**

How to write a C program? A program must have at least a main function. A function consists of declarations and statements. A statement is an expression followed by a semicolon. For example, `a + b`, `printf("C program examples")` are expressions and `a + b;`

# Access Free Programming In C Sample Question Paper

and printf("C is an easy to learn computer programming language"); are statements.

## **C programs | Programming Simplified**

C functions are used to avoid rewriting same logic/code again and again in a program. There is no limit in calling C functions to make use of same functionality wherever required. We can call functions any number of times in a program and from any place in a program. A large C program can easily be tracked when it is divided into functions.
